

2.2 LEED Certification Opportunities

Oshkosh Door Company is committed to continually reviewing our product offering to help ensure we offer the most environmentally friendly products available, our architectural grade products can assist you in achieving **LEED** credits including recycled content, regional materials, and rapidly renewable materials, certified wood and low-emitting materials.

The **LEED** (Leadership in Energy and Environmental Design) Green Building Rating System® is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings. **USGBC**'s members, representing every sector of the building industry, developed and continue to refine **LEED**.

Leed Credit	Leed Criteria	Core Construction						
Oshkosh Nomenclature		GP	GPF	GPFSC	GT	GW	GF	GSFSC
<u>Materials & Resources</u>		Particleboard			Structural Composite Lumber	Agrifiber	Fire Retardant	Stave Lumber
MR 4.1	Recycled Content: 10%, (sum of post-consumer + 1/2 pre-consumer)	Yes	Yes	Yes		Yes		
MR 4.2*	Recycled Content: 20%, (sum of post-consumer + 1/2 pre-consumer)	Yes	Yes	Yes		Yes		
MR 5.1	Regional Materials: 10% (Extracted and manufactured regionally)	Yes**	Yes**	Yes**		Yes**		
MR 5.2	Regional Materials: 20% (Extracted and manufactured regionally)	Yes**	Yes**	Yes**		Yes**		
MR 6	Rapidly Renewable Material Use rapidly renewable building materials and products (made from plants that are typically harvested within a ten-year or shorter cycle) for 2.5% of the total value of all building materials and products used in the project.					Yes		
MR 7	Certified Wood Use a minimum of 50% of wood-based materials and products, which are certified in accordance with the Forest Stewardship Council (FSC) Principles and Criteria, for wood building components.			Yes (FSC Certified)				Yes (FSC Certified)
<u>Indoor Environmental Quality</u>								
EQ 4.4	Low Emitting Materials: Composite Wood		Yes	Yes	Yes	Yes	Yes	Yes

*One point in addition to MR Credit 4.1

**Special qualification apply, job site must first be within 500 miles of Oshkosh, Wisconsin.

<u>Materials & Resources</u>	<u>Intent</u>
4.1 Recycled Content: 10%, (sum of post-consumer + 1/2 pre-consumer)	Increase demand for building products that incorporate recycled content materials, thereby reducing impacts resulting from extraction and processing of new virgin materials.
4.2 Recycled Content: 20%, (sum of post-consumer + 1/2 pre-consumer)	Increase demand for building products that incorporate recycled content materials, thereby reducing impacts resulting from extraction and processing of new virgin materials.
5.1 Regional Materials: 10% (extracted, processed and manufactured regionally)	Increase demand for building materials and products that are extracted and manufactured within the region, (500 miles of project site) thereby supporting the use of indigenous resources and reducing the environmental impacts resulting from transportation.
5.2 Regional Materials: 20% (extracted, processed and manufactured regionally)	Increase demand for building materials and products that are extracted and manufactured within the region, (500 miles of project site) thereby supporting the use of indigenous and reducing the environmental impacts resulting from transportation.
6 Rapidly Renewable Material	Reduce the use and depletion of finite raw materials and long-cycle renewable materials by replacing them with rapidly renewable materials.
7 Certified Wood	Encourage environmentally responsible forest management.
<u>Indoor Environmental Quality</u>	<u>Intent</u>
4.4 Low Emitting Materials: Composite Wood	Reduce the quantity of indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well-being of installers and occupants.
